Metering and Monitoring – Credit Criteria

☐ Accessible metering has been provided to monitor energy and water consumption of all energy and water common uses, major uses, and sources to meet the mandatory minimum requirement of this credit.

[\[Insert hyperlinks to documents which support these claims\]](#)

[\[Provide project drawings and specification extracts of all meters and their locations\]](#)

The project has monitors its energy and water use through the following monitoring strategy:

	Monitoring Strategy	Description	Points Available	Points Claimed
1	Basic Monitoring Strategy	A comprehensive monitoring strategy, which includes frequency of monitoring, and estimated end uses, has been developed for the installed meters.	1	[1]
2	Advanced Monitoring Strategy	The monitoring strategy (as described above) is addressed through a system capable of capturing and processing the data produced by the installed energy or water meters (or both), and is accurately and clearly presented and reports on consumption trends.	1	[1]

1 – Basic Monitoring Strategy

A monitoring strategy has been developed in accordance with a recognised standard which specifies all building monitoring systems, and informs the building manager how they are to be read, how often and by whom.

[Insert hyperlinks to documents which support these claims]

[Provide copy of monitoring strategy document specific to the building]

Total Points Claimed: [1]

2 – Advanced Monitoring Strategy

The project includes an automated monitoring system which captures data from all energy and water meters within the project and provides accurate and easily read reports on consumption trends.

[Insert hyperlinks to documents which support these claims]

[Provide automatic system data sheet and extracts of commissioning report showing system is operating]

Total Points Claimed: [1]

Discussion

[Insert any issues you would like to highlight and clarify to the Assessment Panel.]
