

CITY WALK

Inspections of
sustainability
features in
Perth's new
commercial
buildings

Join us on a tour of three sustainable and innovative (CBD) buildings.

A: Durack Centre
B: 140 William
C: Brookfield Place

The walking tour will identify what drives sustainability initiatives in commercial buildings and consider performance vs. design to find out:

- How sustainability features are valued by tenants and the community? and,
- How successful are sustainability features are and how are they being monitored?

The 'City Walk' will conclude with drinks hosted by NDY in their CBD office.

Get Involved
