

Green Star – Office Interiors v1.1

Indoor Environment Quality IEQ-4 Daylight Glare Control

| Points Available | Points Claimed | CIR Submitted |
|------------------|----------------|---------------|
| 2 | 1 | N |

Credit Criteria

Up to two points are awarded where it is demonstrated that glare is reduced, as follows:

- 1 point is awarded where automated blinds/screens with a Visual Light Transmittance (VLT) of less than 10% and a manual override function are installed by either the tenant or the base building owner to reduce glare associated with natural lighting and eliminate all direct sun penetration;
- 1 point is awarded where all workstation monitors provided as part of the tenancy fitout are flat-screen and are mounted on an adjustable arm that enables the monitor to be pivoted and adjusted horizontally and vertically.

Documents Provided

| | |
|---|--|
| ✓ | As-built architectural drawings that show the location of blinds/screens included in the tenancy fitout and marked up to show how all direct sunlight penetration is controlled; |
| ✓ | A copy of the data sheet that shows the VLT properties for the installed blinds/screens; |
| ✓ | Information confirming the installed blinds/screens are connected to an automated control system with a manual override function that enables occupant control; and |
| ✓ | Information from the supplier/installer that quantifies all products supplied and installed in fitout. |

Discussion

- Verosol blinds have been installed in all perimeter windows to control daylight glare. They are connected to the Dynalite touch screen and are automated with manual override.
- An as-built architectural plan has been provided to show that blinds have been installed on all windows. An elevation as-built drawing has been provided to show how blinds prevent direct sunlight penetration. An electrical as-built drawings has been provided to demonstrate that all blinds are connected to a relay controller for automation and manual override function.
- The VLT data sheet demonstrates that blinds used have a VLT of 5%.
- The letter from Dynalite demonstrates that blinds have been automated to raise and lower on a preset schedule with manual override from the Dynalite touch screen.
- Finally, supplier/installer invoices from Verosol demonstrate that the 68 roller blinds have been supplied and installed.

FEATURES

SilverScreen™ semi transparent metal backed screen fabric provides excellent vision out. SilverScreen™ dramatically reduces heat and glare at the window independent of colour. It is constructed from a hard wearing PVC coated fibreglass yarn and woven to 1900mm and 2400mm in width. SilverScreen™ is inherently flame retardant.

SilverScreen™ is designed specifically for manual and motorised roller blinds systems.

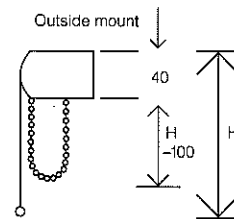

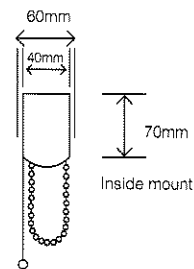

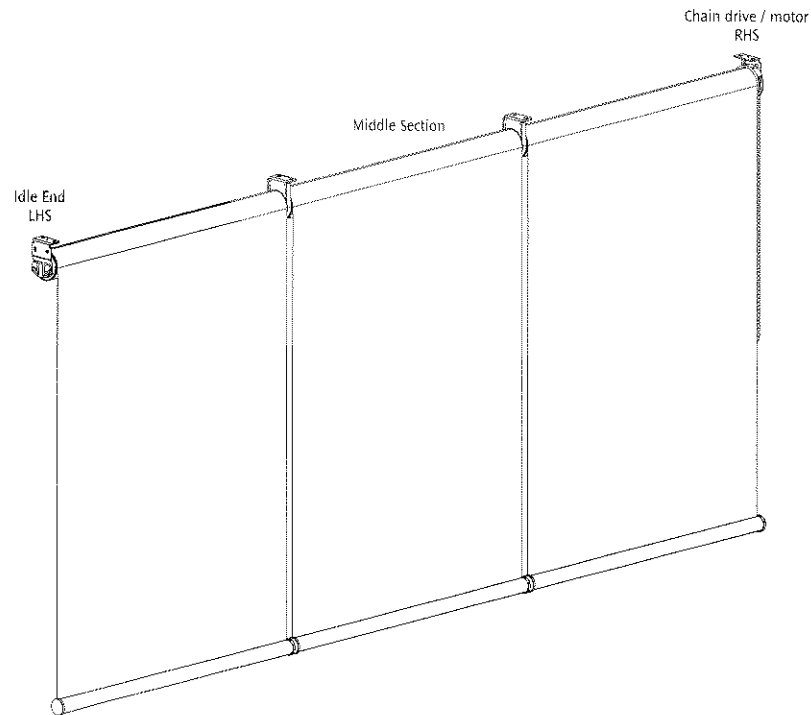

Note: All presented data calculated in WIS 3.0.1 (Advanced Windows Information System) with spectral data. Specifications and other data are based on information available at the time of preparation of this document and are subject to production tolerances and/or change without prior notice. Flame retardancy information is sourced from AWTA testing results. Please note that test results may vary slightly depending on fabric colour. [Solar Control Glazing EN 13363-2, ISO 15099, Measurements according to EN410], [3mm Single Glass(Pilkington OpCL_3.plg) according to EN410, ISO 9050 and ISO 15099 without ventilation].

Verosol®

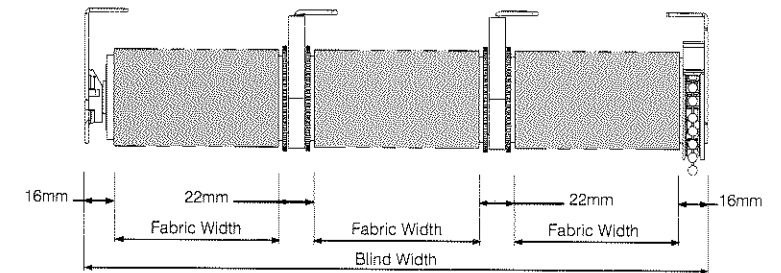

AMBIENCE MULTI-LINK ROLLER SYSTEM

Optional Headbox

Maximum roll size:
75mm diameter

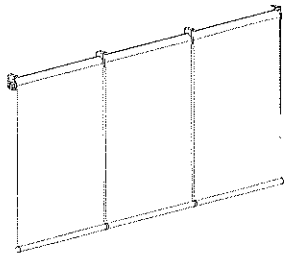

FEATURES

Operate multiple blinds for larger window spans with a single chain, eliminating unsightly cords. The result is better light control, greater privacy, uninterrupted views, and indoor/outdoor accessibility. The system is also available as motorised, with one tubular motor driving multiple sections. Can be easily upgraded from chain to motorised at any time. Optional cassette style headbox is also available.

Verosol®

SPECIFICATIONS

AMBIENCE MULTI-LINK ROLLER SYSTEM

| | | |
|-----------------|--------------------------------|---|
| Available sizes | Subject to material roll width | Width to drop ratio: 1:3 or less |
| | Width | 2400 mm Maximum – 500mm Minimum |
| | Drop | 3000 mm Maximum – 500mm Minimum |
| Fabric | Maximum area | 15m2 (max.3 sections) – Chain Drive system |
| | Maximum area | 24m2 (max.4 sections) – Motoerised system |
| Top roller | Material | Extruded aluminium roller tube |
| | Diameter | 43mm |
| | Wall thickness | 1.25mm |
| Bottom rail | Material | Extruded aluminium alloy |
| | Diametre | 21mm |
| | Wall thickness | 0.8mm |
| | Colour | White, Black, Grey, White Birch and Clear Anodised aluminium |
| Control | Type | Chain Drive |
| | Mechanism | Direct action dual reverse clutch wound spring which operates in such a way that it only applies the precise braking power necessary to keep the blind in the desired position. |
| | Intermediate | Female drive unit and male receiver, with nylon retractable spindles and clear PC control wheel |
| | Idler | Spring pin idler end for easy installation. The idler end mechanism also incorporates a quick release system which allows easy removal of the blind. |
| | Colour | White, Black, Grey, White Birch |
| Control chain | Material | PVC or Nickel plated Steel |
| | Colour | White, Black, Grey, White Birch in PVC, Silver in nickel plated steel |

| | | |
|------------------|---|---|
| Brackets | Material | Press formed steel, pre-treated and powder coated |
| | Options | Top or Face fixing; Left or Right Control |
| | Colour | White, Black, Grey, White Birch |
| | Paint | Electrostatic powder coated and baked |
| Plastic Cover | Material | Acetal Compound and masterbatch |
| Motorisation | 240V AC | 40mm tubular motor mounted internally within a 43mm aluminium tube. The motor is complete with in built limit switches and a variety of control options available including radio remote control. |
| | | |
| Optional Headbox | Type | Two piece cassette style |
| | Material | Extruded aluminium alloy [T5 Temper] |
| | Wall Thickness | 2.0mm |
| | Dimensions | 87mm (depth) x 90mm (height) |
| | Colour | White, Black, Grey, White Birch, and Clear Anodised Aluminium |
| Important Note: | Fixing | Top or Face |
| | Maximum Width in one length of Headbox is 4.8mtrs | |

06 March 2009

Joe Karten
Green Building Council of Australia
Level 15, 179 Elizabeth St
Sydney, NSW 2000

Dear Joe,

Following the final programming and commissioning of all lighting and blinds in the GBCA Sydney Office fitout at 179 Elizabeth Street, I confirm the following:

- Board Room default lighting levels are at a 320-400 LUX average – and lighting controls reset to these levels (or off) when video conferencing equipment is not in operation.
- The lighting has been grouped into the zones called out on the E001 Lighting plan produced by KLM and no zone exceeds 100m².
- Switching for task based lighting at workstations is controlled via staff computers at the location. Switching for general lighting is controlled via the touch screen near reception. Switching for circulation lighting controlled via PIR and photo-electric sensors. Switching for meeting room lighting is controlled via PIR and through a manual override switch in each meeting room.
- Window blinds have been programmed for full automation with manual override function controllable from the touch screen near reception and from within the Board Room for Board Room window blinds.

The lighting has been fully programmed and commissioned in accordance with the GBCA Fitout Lighting Control document produced by Vision Design.

Feel free to contact me with any further queries you may have.

Kind regards,
Joseph Gebaily
Technical Leader NSW Commissioning
